Electrical machines: contents and references

	Title	Chapman	Umans
Introduction to electrical machines			
1	Introduction	notes	notes
2	Characteristics and nominal values	notes	notes
3	Construction	3.6,4.1,6.1,6.7,7.6	1.3-1.6,4.1-4.4,4.9
DC machines		**Ch 7-8**	**Ch 7**
1	Introduction and operation principle	7.1-2	4.6.2, 4.7.2, 7.1
2	Construction	7.3,7.6	4.2.2, 7.2
3	DC motor model and characteristics	8.4-6, 8.12-14	7.3
4	DC motor problems	7.4	7.4,7.8,7.9
Exercises			
AC machinery fundamentals		**Ch 3**	**Ch 4**
1	Rotating field	3.2-3	4.2.1, 4.3.1,4.4,4.5
2	Induced voltage	3.1,3.4,3.5	4.6.1
3	Induced torque		4.7.2
Synchronous machines		**Ch 4-5**	**Ch 5**
Synchronous generators		*Ch 4*	
1	Intro, operation principle	4.2-3	4.2.1, 5.1
2	Electrical behaviour	4.4-5,4.7	5.2, 5.3.1
3	Power and torque	3.7,4.6	5.4, 5.7
4	Use of synchronous generators		(5.1), notes
	Island operation	4.8 (short)	
	Infinite bus	4.9 (short)	
	Ratings	4.11	(5.5)
Synchronous motors		*Ch 5*	
5	Intro, operation principle	5.1	4.2.1, 5.1
	Electrical behaviour	5.1	5.2, 5.3.1
6	Characteristics	5.2	5.4, 5.7
7	Use of synchronous motors	5.3	(5.1), notes
Exercises		*Ch4-5*	
Induction machine		**Ch 6**	**Ch 6**
1	Introduction and construction	6.1	6.1
2	Operation principle	6.2	6.1-2
3	Equivalent circuit	6.3	6.3-4
	Measurements	6.11	6.6
4	Power balance	3.7,6.4	6.5
5	Torque-speed characteristic	6.5,6.6	6.5, 6.7
	Unbalance	notes	notes
6	Use of induction machines		
	Starting and braking	6.8,notes	(6.7.3), notes
	Generator operation	6.12	notes
7	Motor selection and standards	6.13	notes
Exercises		*Ch 6*	
Single phase machines		**Ch 9**	**Ch 7-9**
1	Universal motor	9.1	7.1
2	Single phase induction motor	9.2-3	9.1, 9.2.1-3, 9.3
Motor selection			
1	Methodology	notes	notes
2	Examples	SEW (Toledo)	SEW (Toledo)
